additional information

Hose assembly machine

"The optimally secure connection of compression fittings for hydraulic hoses requires the correct specific contact pressure when fitting the cutting ring. The cutting ring assembly device TRACTOPRESS is equipped with automatic pressure adjustment, so that any possible errors are excluded from the outset." Excerpt from the manufacturer.

Application: For crimping e.g. hydraulic hoses of size 6 to 40mm.
With our equipment we secure the range from 6.0 to 28.0 mm.
